WHAT HAVEN'T YEAR 1 DONE THIS TERM

Year 1 has done some growing and not just in their height.

We have been very busy growing grass heads and beans...Check them out below. We have also been researching and learning about lots of different animals, from butterflies to ducks. In their writing, Year 1 have explained how animals GROW and CHANGE.

SPOTLIGHT ON LONGNECK LAGOON

These are our crazy grass heads.
Longneck Lagoon was an exciting excursion that allowed us to put all of our learning about growing and changing into practice. It gave us a chance to look at animals closely under the microscope and even catch a few of our own.

WHAT AN AMAZING TERM!
