5/6B have produced lots of fantastic work this term. Our activities this term have been based around the Living Land unit. As part of this we have learnt about how humans interact with the environment and our author study has focussed on the author Jeanie Baker.

The students read many of Jeanie Baker’s books and spent a lot of time discussing the messages that she was trying to convey. Then, they studied the techniques she uses to create 3D like images, before producing their own collages from the natural and built environment around our school. The final products were stunning!
