Nickhel thinks that our kitchen garden is beautiful. It has heaps of fresh veggies and fruits. Our whole school is very grateful to have this garden AND new kitchen.

Ester thinks that the Mathlympics activities were amazing because they were so much fun... it’s also good learning new skills at the same time.
Angel thinks that the Fair Play games that we have experienced were AMAZING! It is a great way to see other students actually realise the skills they are good at.

Science
Our Science lessons were one of our favourite things this term for sure. Lent was really excited when we had our very first science lesson the ‘roaring telephone’. We learnt about chemical, light, electric and sound energy.

Mia said that camp was AWESOME. She also said that her favourite activity was rock climbing because she went up against her close friend and climbed to the top first.
