KP’s fantastic learning this term.

In maths we have been learning about number and doing a lot of measuring. In these photos you can see us measuring and comparing length using a piece of string. We are also measuring the area of shapes using unifix cubes.

We have had some special visitors in our class and have had a lot of fun caring for them by changing their food and water every day. Sonny, Zane, Aminata, Chiano, Solomon and Isabelle showed us how to hold the chicks carefully.
We have been writing amazing descriptions about farm animals!

Here is Chiano, Matthew, Serita. Tyeesha, Typeka, Zane and Solomon’s writing.

A chicken is a bird. Chickens have brown feathers. Chickens live in a barn.

A pig is pink and it has pinky ears and it lives in a farm.

Last week we went to the farm. I saw a pig.

The white goat has tall hooves.

The brown monkey has long tail.

Chickens live in a barn. They can sleep on a chicken.
